Part B for Sep 1935

SUBJECT

Fixing give Establishment, Tools & Plant Charges on the outlay of works and repairs executed by the PWD ~~works~~

G.O. no L 2144-62 of 18 9 35 to Direc of Works, Chief Engr, Secretaries of Departments & Presidents of Districts Boards, Commissioner Nilgiris

Passes order in the matter of fixing the charges at 12 and 1/2 per cent respectively

WP 01997—DTP B—22 500 6-6-35

Installation of a pumping unit at Mydala tank, Tumkur Water Supply at a cost of Rs. 3 800/- and the levy of the establishment and tools and plant charges calculated at only 7½% on the initial outlay instead of the usual 18½%

Financial Secretary's orders thereon

1) May be communicated But the general principle of waiving or reducing centages arbitrarily may be taken up separately

---- (Id) S S 25-6-33

2) Establishment tools and plant charges are being waived in some cases To discuss the general question of such waiver, the practice in Madras and in Government of India may be ascertained It may also be seen if such cases have been noted in the Government of India Audit and Appropriation report

3) A note may be put up with references and submitted in about a fortnight

(Id) S S

3-7-33

General and Revenue Secretariat | File No | of 193

Serial No

4) Submitted the rules regarding the adjustment of the charges for establishment and tools and plant on the outlay on works and repairs are laid down in para 514 Mysore Public Works Account Code The charges usually ~~charged~~ levied are 17½% on the outlay on works and repairs for Establishment and % for Tools and Plant In the case of Contribution works however the charges will be calculated at 10% and ½% for Establishment and Tools and plant respectively Certain Non Government works are also exempted from the levy Para 514 M P W A C states that Contribution works may be specially exempted by Government from payment of these charges

5) Para 513 M P W A C lays down that the Public Works department may take into account concessions shown by Government in the various cases where Establishment and Tools and plant charges for works done for other departments Local Bodies etc are waived and show in its Administration reports the real cost of such charges on departmental works and the proportion ~~they bear~~ to the outlay on such works

6) The point for consideration whether it is not desirable to lay down certain working rules or principles as regards cases in which these charges can be reduced or in which the recovery thereof can be completely waived The entire expenditure on account of establishment in the Public works department is accounted under '24 Civil works' and credit is taken for the charges transferable to other departments and Non Government works and the net amount chargeable to Government shown in the Budget estimates Waiving the

WD 70—GBPM—60 000—13 8 31

recovery of these charges means increase of expenditure to Government and the proposals for reducing the charges to be levied or waiving the recovery have therefore to be considered in the same way as proposals for incurring extra expenditure from General revenues

7) Para 283 of the Government of India Public works department code requires that no reduction of Establishment and Tools and Plant charges should be made in the case of works costing Rs 1000 or more and according to para 455 of the same code Local Governments are competen to waive recovery of departmental charges for establishment and tools and plant on works carried out on behalf o Municipalities and Local funds and on contribution works only when the cost of the works is less than Rs 1000.

8) A rule similar to Para 283 of the Government of Indi Code is also found in Para 210 of the Madras Public works department code. Appendix 7 of the Madras Public works Account code contains certain detailed rules for the distribution of the Establishment and Tools and Plant charg and the percentages to be charged on the works outlay towards these charges vary with reference to different classes of works (drainage schemes works done in the work shops etc) while we have only two percentages 10 per cent ordinary cases and 10½ per cent for contribution works

9) Rule 9 of this Apendix 7 of the Madras Code also state that the prescribed percentages can be remitted with the sanction of the Local Government in the case of Non-Government works costing less than Rs 1000 and that the remissio of charges is not permissible in other cases as such aid

Serial No

as it may be desired to give to a local body in the construction of a work in which it is interested is usually given separately in the form of a cash grants-in aid

(c) In the British Indian Audit reports the principles regarding the adjustment of these charges are usually referred to in a separate para and from a perusal of some of the above reports, cases of deviation from the prescribed rule have not come to notice

(d) The rule followed in British India and explained clearly in Rule 3 of Appendix 7 of the Madras Public works Account Code may perhaps be adopted here also Applying this rule the establishment and tools and plant charges can be remitted only in cases where the cost involved is less than Rs 1000 and in all other cases any concessions which Government may require to show may be in the shape of a Cash grant in aid up to the extent admissible under the grant-in-aid rules or special rules framed by Government This aspect of the section has been raised by the Finance department in some of the files relating to the waiving of these charges, referred unofficially to this department for opinion and the point is raised specifically on this file for enunciating general principles

2 W
18-8 33

H Seey) 22/8/33.

12 (1) The main gist of the note is that when waiving is sanctioned, automatically the anticipated reduction of the charges distributed to the several works (on first buildings and other works) is not realized and hence an increase of expenditure to that extent occurs

Note—Contn Sheet

File No 139/C of 193 | General and Revenue Secretariat

Under present arrangements, the Compiled accounts do not exhibit anywhere the consolidated total of the several concessions sanctioned from time to time. Even if they the full grant to the local bodies have been given ~~the~~ such charges are being waived and the result is practically to allow the local bodies financial concessions in excess of the full grant. The main points to be decided in this case are (1) The waiving of the recovery of these established charges should be subject to regulation (2) There should be a financial limit of the total value of work up to which the charges on account of normal supervision over works should be regulated. In the Madras Govt it is Rs 10000/-/- Perhaps in this a smaller limit of Rs 5000/-/ may do. (3) When the recovery foregone is in excess of a certain other limit, it should be exhibited separately under the grant-in-aid given to the institution concerned, forming part of the maximum allowed or allowable under the rules. This would have the effect of bringing in a consolidated form in the account the total effect of such waiving instead of it being lost sight of under a dozen heads.

I shall be obliged by the P W D Secretary and Gen Secretary (Mr G by) offering remarks on the above 3 points.

Retransmitted with compliments to the General Secretary.

2. The Financial Secretary points out in his Note that even when full grants, by which I believe he means 50 per cent of total estimate, have been given to the Local Bodie Establishment and Tools and Plant charges are being waived with the result that the Local Bodies practically get financial concessions in excess of the full grant This is not so. For, in no case, including the Establishment and Tools and Plant charges, the total grant has exceeded 50 per cent of the estimate Till recently Government wer making contributions to the Local Bodies to the extent of half the estimated amount for water supply projects The Budget grants for improvements having been curtailed owing to financial stringency, it is not now possible to allot half the estimated amount In many cases therefore recommendations have been made to waive the Supervision and Tools and Plant charges These charges along with the contributions have never exceeded 50 per cent of the total estimate

3. The Financial Secretary further points out that the complete waiving of the Supervision and Tools and Plan charge introduces difficulty in accounting and he therefore suggests that these may be booked as grant-in-aid I quite agree with his view in regard to the difficulty in accounting

There is need therefore for some definite policy in the matter of supervision and Tools and Plant charges Th British India practice would not quite suit us, our scheme being small, Government grants being curtailed and the Local Bodies being poor

I would therefore suggest that a uniform rate of 7½ rged for all estimates irrespective of the

General and Revenue Secretariat | File No | of 193

Serial No

the amount of contributions made from Government
In special cases however, Government may waive
the Supervision and Tools and Plant charges completely

2. The present maximum rate of 18 per cent seems rather excessive The 7½ per cent will cover the expenses of the Establishment of the Bureau of Sanitary Engineering and for this reason it is recommended

2 The opinion of this office is called for in regard to the proposal of the Director of Health to levy Establishment and Tools and Plant charges only at 7½% for works executed by the Bureau of Sanitary Engineering

3 The works executed by the Bureau are mostly on behalf of the Local Bodies and charges leviable as per existing rules are 17½% and ½%

4 The proposal to levy only 7½% does not cover the above charges incurred by Government in full and the acceptance of the proposal results in excess charge to Government

5 As per App 7 Madras P W Accounts Code the total charges including Establishment and Tools and Plant and other charges for water supply and drainage works come up to 15½%

M Varadaraja Rao
Comptroller in charge
23/10/34

Returned to the Comptroller for stating what the correct charges would be leviable would be if 7½% is too low (Para 4 above)

27 2 The outlay on the Executive Sanitary Engineer's Establishment worked out to Rs 56,900 during 1932-33 and is distributable among the works supervised by it, the outlay on which aggregated to Rs 5,83,557/- as detailed in the margin

1	VaniVilas Water Works	Rs 1,49,302
2	Mysore City Municipality contribution works	16,250
3	K G F Water Works	87,005
4	Other Works	3,31,000
	Total	5,83,557

FN[illegible] 1 A A 5 13 No[illegible]

28 3 The share of contribution on account of establishm charges, recoverable from the VaniVilas Water Works, K G F Water Works and the Mysore City Municipality works worked out to Rs 12,720 as follows -

(i) 5 p c on Rs.20,533/- (The portion of the establishment on which 5 p c has to be levied as per G O No L 3731-33/M1 12-32-102 dated 23/25-11-33) from Vani Vilas Water Works Rs 1027-0-0

5 p c from Mysore Municipal Contribution works (G O No L 4391-21 of M1 84-26-24 dated 19-12-28 and G O No L 3731-33/M1 12-32-102 dated 23/25-11-33) 1028-0-0

12 1/5 p c from K G F Water Supply based on the proportion levied in years 1931-32 & 32-33) 10665-0-0

Total 12720-0-0

27 The balance of establishment charges distributable among other works is therefore Rs 44 180 The percentage of this to the outlay (4) above works out to 13 1/3 To this has to be added 2½ p c for Direction and audit charges and the total levy on account of establishment works out to about 15 5/6 or 16 p c It may also be observed that no contribution on account of establishment is levied on some works Another 2 p c levy for Tools and Plant charges has to be made on these works as per para 514 of the P W Account Code

(3) From the Comptroller's note it will be clear that even with regard to works undertaken by the Sanitary Engineering department at least 16 per cent has to be charged on account of establishment charges and ½% on account of Tools and Plant charges The present rate is 17½% for the former and ½% for the latter In some cases extra special establishment may have to be entertained for the supervision of individual works and as pointed out by the Comptroller no contribution is levied on some works (Palace funds and Muzrai funds etc) If these factors are taken into account the present rates cannot be considered as high on the whole The proportion which the total establishment charges in the P W D bear to the total expenditure on works and repairs under all funds comes to about 10%

(4) I am therefore of opinion that no reduction in the existing rates is called for and that these charges at the prescribed rates should be provided for in the estimates in all cases and it is not desirable to reduce or omit the provision on this account in any case

Serial No

42) The question of reducing the establishment Tools & Plant charges for water supply & drainage works undertaken by the Sanitary Dept on behalf of local bodies has been before Govt a number of times and in some cases it has been ordered that the charges be reduced to 7½ or 5%. In a number of cases recently it has been ordered that the charges may be lowered at 1½% annual but the value of pipes and machinery purchased should be left out of calculations for this purpose and this is in accordance with article 516 (c) of the Nyasa Public works account Code

43) The charging of the full 1½% on cost of the total expenditure on works out of a great number of the bulk of the expenditure in a large majority of the cases relates to the purchase of pipes pumping plant or other machinery which are all more or less standard articles made by well known manufacturers and the supervision exercised by the Dept is very little so it is even conceivable that the local body can in a number of cases engage specialists for the occasion and get the work done much cheaper Professional contractors [illegible]

NOTE—Contn Sheet

WD 0 955—GPB—22 500—12-6 34

not charge so much and the working
of the work being done by the Sanitary Depart-
ment and the payment by heavy establishment
charges as in the way the progress of
works calculated to enhance the pecuniary
wants of the people However owing to the
present financial condition Govt are
not in a position to sanction grants as
liberally as they were ever wish Still
these considerations make it desirable
that these charges should be reduced

(4) The Financial Secretary
does not feel that the ratio of the cost of establish-
ment to value of the works is at present excessive
and that any reduction must conduce further
to increase the cost of Govt works. He
is not therefore in favour of reducing the
scale but would think that Govt should of course
declare in favour of the grants

(5) This ratio again depends
upon the P'w D budget and in figures
distinctions is not made in regard to the
allocations to several Kinds of works as
in Madras for example

(6) The Chief Engineer who
was in Council has suggested that in
fixing the rate, we may confine
ourselves to the charges for work done

Serial No

by the Sanitary Bureau The Financial Secretary is agreeable to this but feels that owing it will not be possible to advance the sum

47 But the Bureau has other activities viz

1 Maintenance of numerous water supply works

2. Inquiring about & making of Mosquito control

3 Approval of plans for building schemes etc

4 Checking pumps & water etc

Recently breweries & their suppliers has also been entrusted to them In regard maintenance at varying rates about 37 per cent of allotment is over absorbed Bureau says this very difficult to allocate the cost to the various works undertaken by them and to ensure proper distribution to the different types of Revenue & Loan Votes the collection of the funds & the Bureau Though the work may be less

48 It is not known why the wholesome provisions under S.T.C. 6 of the Hygiene Public Works account code was not followed till now If this procedure is adopted it will relieve the position and the Municipalities will have to bear an equitable burden

49 In the circumstances fully the Financial Secretary has requested that the Comptroller should—

There is probably less improper work in Vehicles work

so forwarded unofficially that - - -

Serial No

on account of their purchase cannot be accepted Charges are incurred in ordering the necessary material testing and passing the same and storing and accounting for them before issue In fact the Electrical Department levies as much as 10 per cent on the value of materials in stock on account of handling and other charges Of course it may be admitted that the cost of supervision on this account is less than that on account of original construction proper and if deemed fit a ~~ximilar~~ smaller percentage say about 7½ per cent may suffice But having ~~rates~~ different rates of per centage levy for stores and for ~~office~~ other expenditure would be a cumbrous procedure

53 It may be noted in this connection that any reduction on account of the levy of Establishment and Tools and Plant charges will automatically increase the establishment charges in Public Works Department, which even now works out to nearly 20 per cent of the total expenditure on works undertaken by the department (the actuals for 1933-34 being so high as 18.34%)

54 Even taking the establishment of the Sanitary Bureau itself the percentage of charges on Establishment to the outlay incurred on account of works executed by that Division works out to 14 per cent including 1 5 per cent on account of Direction charges and 1.0 p c on account of audit (supervision charges)

55 If 1% on account of S P C charges is added the percentage would be 15% so in any case a percentage lower

NOTE—Co tn Sh t

File No of 193

1/IV
10 7 35

1517/35

FINANCIAL SECRETARIAT U O No FI 99 10 JUL 1935

65 Reference is invited to my note dated 18th September 1934 The proportion which the total establishment charges in the P W D bear to the total expenditure on works and repairs comes to about 18% to 20% The present rate of 18% (17½% for Establishment charges and ½% for Tools and Plant) cannot therefore be regarded as high

66 From the Comptroller's note dated 4th July 1935 it will be seen that even taking the establishment of the Sanitary Bureau itself a percentage lower than 15% would not adequately cover the actual charges for Establishment The percentage for both Establishment and Tools and Plant charges will be 15½ (including ½% for Tools and Plant) In Madras 15½% is charged for water supply and drainage schemes actually executed

What about the Bureaus new work ?

Establishment, Tools & plant charges

towards Establishment and Tools and Plant charges and this is levied on the actual outlay booked in the accounts and no item of expenditure is excluded from the levy on the plea that it involved little or no departmental supervision In addition the Madras Government levy 2½% on the estimated amount on plans and estimates for water supply and drainag schemes which are not executed but are finally recorded ar revised

67 Any decrease in the prescribed percentage will result in increase of expenditure under 24 Civil Works'

68 I am therefore still of opinion that the present percentage is not high and has to be charge on the entire outlay booked in the accounts The proposal to charge 18% on a portion of the outlay (exclusive of pipes machinery etc) or to charge only 7½% on the entire outlay is not financially acceptable If some concession is considered absolutely necessary in respect of water supply and drainage schemes, the percentage may be reduced to 15½ as in Madras

69 Further it is always desirable to show in the accounts the grant-in-aid given to Local Bodies as a direct subvention instead of as an indirect subvention

70 At present, the Estt charges work at 18½ for

71 The question is now between 7½ / recommended by the Dist Sanit or 15½ / suggested by the Pe Sanit, as test, establishment charges for Sanit water supply works. Perhaps the former figure is too low while the latter is high, considering the fact that most of our schemes, unlike Madras are mere ones of small municipalities with limited resources

72 The subject may be discussed at a meeting of the Dewan approves

Subject —

Question of reducing the Establishment, Tools and Plant charges for work executed on behalf of Local Bodies by the Public Works and Sanitary Engineering Departments

The question of reducing the Establishment, Tools and Plant charges for works executed by the Sanitary Engineering and Public Works Departments on behalf of Local Bodies has been before Government for some time past In some cases, the charges were either waived or reduced from 18 to 7½ or 5 Per cent on the recommendation of the Director of Health or the Chief Engineer The Director of Health reports that the present maximum rate of 18 per cent is excessive, while a number of applications are being received from the Local Bodies to waive or reduce these charges in the case of works executed for them by the Public Works or the Sanitary Departments Considering the fact that most of our schemes are minor ones for small Municipalities with limited resources, the present charge appears to be high The subject was accordingly taken up for consideration at a meeting of the Council held on the 15th August 1935, when it was resolved as follows -

"In respect of water supply and drainage works executed by the Public Works Department or the Sanitary Engineering Department, the establishment and tools charges may be reduced to 12 and 4 per cent respectively

The Resolution of the Council may be graciously approved

Iyengar

MEMBER OF COUNCIL

the 193

Proceedings of the Government of His Highness the Maharaja of Mysore

Date of issue 18-9- 1935

Read— Paras 5-14 of P W A Code fixing the Establishment charges at the rate of 17½ % on the outlay on works and repairs executed by the P W D, and Tools & Plant charges at half percent on the outlay on works and repairs

May this be—

(i) printed? yes

(ii) treated as a standing order? yes

(iii) published in the Gazette English Part? yes

(iv) translated? yes

(v) placed at the disposal of the press? yes

(vi) published in the Gazette Kannada Part? yes

Order thereon—No L2144-6207

the question of reversing the Establishment charges at the rate of 17½ % on the outlay on works and repairs executed by the P W D, and Tools & Plant charges at half percent on the outlay on works executed by the Sanitary Engineering and Public Works Department on behalf of Local Bodies has been under the consideration of Govt for some time past In some cases the charges now

to be waived or reduced by funds from 18/
to 7½, or 5/ on the recommendations of
the Director of Health or the Chief Engineer
The Director of Health reports that the present
maximum rate of 18/ is excessive, while
a number of applications are being received
from the Local Bodies to waive or reduce
these charges, in view of their financial stringency
Having regard to
~~Considering~~ the fact that most of
the schemes are minor ones intended for
small communities with limited resources, funds
consider the present charges to be rather high
and are accordingly pleased to direct that in respect of
water supply and drainage works executed by
Panchayat Samithi Engineers or the Public Works Department on behalf of ~~the~~ Samithis and Other Bodies as per List of Enclosure
the Provincial Sanitary Engineering Organisation, the
Unit, and Civil and Plant charges be reduced
to 12 and ½ per cent respectively
